Healthy Longevity Symposium is 2 weeks away - meet our Keynote Speakers!

S. Jay Olshansky, PhD

S. Jay Olshansky received his Ph.D. in Sociology at the University of Chicago in 1984. He is a Professor in the School of Public Health at the University of Illinois at Chicago, Research Associate at the Center on Aging at the University of Chicago, and Chief Scientist at Lapetus Solutions, Inc. – a company that he co-founded. The focus of his research is on estimates of the upper limits to human longevity, exploring the health and public policy implications associated with individual and population aging, forecasts of the size, survival, and age structure of the population, pursuit of the scientific means to slow aging in people (The Longevity Dividend), and global implications of the re-emergence of infectious and parasitic diseases. During the last 39 years, Dr. Olshansky has been working with colleagues in the biological sciences to develop the modern "biodemographic paradigm" of mortality – an effort to understand the biological nature of the survival and dying out processes of living organisms. Dr. Olshansky is the first author of The Quest for Immortality: Science at the Frontiers of Aging (Norton, 2001); A Measured Breath of Life (2013); The Rise of Generians (2020); Pursuing Wealthspan (2020); and co-editor of Aging: The Longevity Dividend (Cold Spring Harbor Laboratory Press, 2015). An updated version of this book will be published in 2024. Dr. Olshansky’s recent work is focused on linking the scientific study of aging with investments in longevity and mortality related products. Dr. Olshansky is a board member of the American Federation of Aging Research (AFAR) and he served on the Board of Scientific Advisors at PepsiCo. In 2016, Dr. Olshansky was honored with the Donald P. Kent Award from the Gerontological Society of America, the Irving S. Wright Award from the American Federation for Aging Research, he was named a Next Avenue’s "Influencers in Aging," and in 2017 he received the Alvar
Svanborg Award. Dr. Olshansky received the Glenn Award from the Glenn Foundation for Medical Research in 2018. In 2022 Dr. Olshansky testified before the U.S. House Committee on Science, Space, and Technology on the topic of aging and Geroscience and how advances in aging biology are about to transform what it means to grow old.

Laura Carstensen, PhD

Laura L. Carstensen is Professor of Psychology at Stanford University where she is the Fairleigh S. Dickinson Jr. Professor in Public Policy and founding director of the Stanford Center on Longevity. Her research on the theoretical and empirical study of motivational, cognitive, and emotional aspects of aging has been funded by the National Institute on Aging without interruption for more than 30 years. Dr. Carstensen is an elected member of the National Academy of Medicine and the American Academy of Arts and Sciences. She served on the MacArthur Foundation’s Research Network on an Aging Society and was a commissioner on the Global Roadmap for Healthy Longevity. Dr. Carstensen's awards include a Guggenheim Fellowship, the Kleemeier Award, The Richard Kalish Award for Innovative Research and distinguished mentor awards from both the Gerontological Society of America and the American Psychological Association. She is the author of “A Long Bright Future: Happiness, Health, and Financial Security in an Age of Increased Longevity.” Dr. Carstensen received her B.S. from the University of Rochester and her Ph.D. in Clinical Psychology from West Virginia University. She holds an honorary doctorate from the Katholieke Universiteit Leuven, Belgium.

Happy Healthy Aging Month!
A "Healthy Aging" Story submitted by one of our readers:

"In 2004, I started a supper club with 5 couples. As an RN, I heard repeatedly in conversation that only a few people in middle age had really close friends to laugh with and lean on in times of need. I wanted to change that outcome in my life, and knew the relationships are built on regular communication. That thought provided the birth place of my project to build better "Life long relationships". Almost 2 decades later, we have built a community of friends to laugh, play, and sometimes cry with. I love them all; and they love each other. Our gatherings aren't fancy and through lock down, we met on Zoom. We have walked together through health crisis, retirements, and losses; yet our collective gains and gratitude are abundant. It's one of the best decisions I have ever made. " - Maureen Martin, RN

As we celebrate this month, we want to hear from you! What are the things you are currently doing to support healthy aging, either in your own life, with your friends and family, or in your community? We will share some of your comments in future newsletters.

Please email saweiss@health.ucsd.edu and share your healthy aging stories!

We Need Your Support!

When you give to the UC San Diego Center for Healthy Aging and the Stein Institute for Research on Aging, you're making the decision to support the pursuit of a healthier, longer life for you and your loved ones. Please make a gift to help sustain and expand our successful aging programs.
